

## MALTING PROCESS CHART

The malting process is described below on the basis of individual sub-processes. Click on a process to display the related JUMO product portfolio and get specific details about measurement and control systems you need.

As an experienced brewer you know that the quality of beer depends on many factors. If you work with reliable JUMO automation systems in the early phase of the malting process, you can rely on producing a high-quality malt in the end of the process.
